Reasons for Allowance

1. Claims 1, 3-10, and 12-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The examiner has found that the prior art of record does not appear to teach or suggest or render obvious the claimed limitations in combination with the specific added limitations as recited in independent claims and subsequent dependent claims. The prior art of record fails to teach or suggest an apparatus and method for authorizing access to a plurality of registers wherein the plurality of registers associated with an Input/Output processor (IOP) via a communication interface, the plurality of registers being placed in a locked condition and unlocked condition, wherein the plurality of registers are placed in the unlocked condition if the IOP is placed in a reset condition in which the IOP is adapted to be placed in the reset condition if the IOP does not clear the IOP reset request from a failsafe register and disable the failsafe boot timer before the countdown expires; the plurality of registers being placed in an lock condition in which access to plurality of registers is prevented if the IOP is placed in an operation condition wherein the IOP is adapted to be placed in an operational condition if the IOP does clear the IOP reset request from the failsafe register and disable the failsafe boot timer before the countdown expires. Therefore these features are novel and also in conjunction with all other limitations in the claims.
